

YOU NEVER KNOW WHAT'S GOING TO HAPPEN...

...when someone brings in an interesting piece. This helmet has as much mystery as history! There is no record of who may have donated this piece or where it came from. It is a conglomeration of diverse items that have been put together, but seem to be from different eras and locations. Is it homemade? Is there some significance to the grouping? What we do know is that there is an inscription which reads : "With God for King and Fatherland".

If you have any answers regarding the origin of this unique helmet on display at the museum, stop by and let us know.
